Profile

Normal guy doing great things. Building digital products that feel smooth, simple, and useful.

Employment History

12/2024 – Present

Frontend Software Engineer - Next.js/React-Native

Remote

Pickleball.com

- Adapting client requests based on already managed infrastructure
- Managing release processes
- Complete redesign and rework of a mobile app
- Development of an admin dashboard for managing sports competitions enabling administrators to configure match formats, scoring rules, teams leagues, players etc.
- Designed and implemented custom dynamic UI components to control tournament flows, scheduling, and user behavior.
- Collaborated with backend engineers to ensure seamless integration of real-time game logic with the frontend.

10/2022 – 12/2024

Frontend Developer / Designer

First professional work experience as a full-time mobile/web frontend developer in a start-up company (React Native/React):

- Developing large scale mobile apps (sales app, crypto investment app etc.)
- Focused on managing client requirements and optimization
- Developing additional apps as accompaniment - marketing websites, admin apps
- Designing and integrating all UI/UX used in the before mentioned apps alongside logos/animations/custom components
- Handling backend work on demand/early task completion on my end

2017 – 2021

Designer – Freelance

- Designing commission logos
- Extensive photoshop and video design jobs

2017 – 2019

Web Development – Freelance

- Developed and deployed business websites for local firms
